

### **Editor's Comment:**

This manuscript is suitable for publication acceptance. However, the following corrections are required:

1. In the abstract, avoid including lots of quantitative result descriptive. More emphasis is needed on the significant findings and practical implications of this experiment.
2. Duplicated keywords (same as in the paper title) must be re-chosen.
3. Use "and" instead of "&" throughout the entire text.
4. The correct form is "45 °C".
5. Numbering of all tables may be simplified to just Table 1, Table 2, etc.
6. Please number all equations, even though there is only one.
7. All acronym names must be defined when first appear, such as DAS.
8. Please define "a.i", "S.ed", "CD".

Many spacing errors, such as "25kg/ha, 20DAS" have been detect. As such, a thorough proof-check and English-check is highly recommended.
