

Editor's Comment:

We carefully analyzed the review process, the reviewers' recommendations and the final paper. The reviewers made important recommendations for improving the paper.

The authors have improved the paper and responded to their requests, therefore I recommend accepting the paper for publication.

However, I recommend that the author finishing the paper before publication and especially to standardize the units of measurement. He currently uses two systems of presentation of units of measurement: he uses when so: 6 g pot^{-1} , when so: $3.08 \text{ mg} / 100\text{g}$. He must use a unitary system throughout the paper.
