

**Editor's Comment:**

The paper titled "**Assessing the Prevalence of Intestinal Parasitic Infections (IPIs) Among the Children of Geidam Central Primary Yobe State, Nigeria**" is a good research, which included some Interesting results. However, **Before the paper is accepted, some contents of this manuscript is suggested to be revised.**

1. ABSTRACT : Background , Methodology and Conclusions were too verbose, while the results was too brief.

2. The results of the main text is recommended to write in 2 points.
