

Editor's Comment:

Major corrections are required

1. the chest ray has evidence of surgical stabilization of vertebral column, no mention about this in the article.
 2. Chest X ray shows no mass of 7 cm. the ct scan image also no visible mass of 5 cm. please check the images.
 3. u have not mentioned the COVID CO-RADS of the patient.
 4. lung mass was diagnosed with either FNAC or biopsy. the authors have not mentioned this or provided any histological subtyping in this case.
 5. moreover the authors have not mentioned any anticancer treatment given to the patient.
- there was clearly no diagnostic dilemma between imagings discriptions u have added For lung cancer and COVID -19. As for comorbidities and there management complicated with COVID in lung carcinoma, this portion is nothing unique for case representation.
please rectify these changes and submit for review again.
