

**Editor's Comment:**

I have carefully evaluated the comments of the reviewers, and correction/changing on the manuscript "2021/JAERI/78561" made by the authors.

The authors have not addressed all comments which suggested by the both reviewers. The authors should consider all comments of the reviewers.

My editorial decision is "re-send to the authors to complete this stage". In this form, the manuscript is not ready for publication in JAERI.

In addition, the referee Sha suggested that the article should be published as a short communication because it contains insufficient data. This suggestion was found suitable by me. After authors' correction, it can be accept as short communication.
