

Editor's Comment:

Authors have addressed the concerns raised by reviewers:

After cautious reading the reviewers' remarks and the authors' responses of the manuscript titled **In-vivo antiplasmodial effect of dihydroartemisinin-piperaquine-nitrofurantoin on Plasmodium berghei-infected mice**..... and numbered 2021/JAMPS/76339....., I strong-willed that "Authors have addressed the concerns raised by reviewers" and propose the acceptance after preparing the article according to the journal style editing.
