My Decision regarding the article number 2021/JAMPS/78438

Authors have addressed the concerns raised by reviewers: After cautious reading the reviewers' remarks and the authors' responses of the manuscript titled **Evaluation of Liver Function and Haemorheological Parameters in some Carpenters Exposed to Wood Dust in Port Harcourt.** and numbered 2021/JAMPS/78438, I strong-willed that "Authors have addressed the concerns raised by reviewers" and propose **the acceptance after preparing the article according to the journal style editing.**
