

Editor's Comment:

About the Work JERR 88675, I tell you that I have reviewed the first and second version of the writing. The authors have corrected some aspects according to what the referees have suggested. However, the referencing has not been corrected. It is necessary that the references expressed in the body of the article follow the increasing numbering 1, 2, 3. . . 22 and arrange the articles in the reference section accordingly. Also, check that there are no spelling errors.

The authors must return the corrected article to review it again.
