

Editor's Comment:

My editorial decision: Return and revise.

There are concerns about this paper including below:

Total how many patients?

In ABSTRACT, 'Eighty (80) obese individuals based on age groups'

In Table 1, 'Background Characteristics (n=50)' 'Male 50, Female 50'. What is frequency? Education Qualification frequency = 50 in total, while Gender and Age are 100 in total??

In Discussion, 'Twenty five percent (25%) of the population are male while Twenty five percent (25%) of the population are females'.

All are not matched. Please clarify.

Also, in ABSTRACT, change 'The table above show no significant difference' to 'Our data show no significant difference'.

Also correct other English errors.
