

Editor's Comment:

Reviewer's comments:

- 1) delete references in the abstract
- 2) Missing to add a series of ethical approvals
- 3) Tables 1 and 2 are still unreadable, not enhanced
- 4) The nomenclature of bar charts 1, 2, 3, and 4 has not been changed to figures 1, 2, 3, and 4, and abbreviations must also be included if significant differences between groups are found and
- 5) Figures 1 and 2 are still excessively large and low resolution; they have not been reduced or improved in resolution
- 6) References have not been updated, they are the same as in the original manuscript
- 7) In the keywords section, accessory ossicles have not been included; they remain the same four keywords.

Accepted after make the corrections indicated above
