

Editor's Comment:

I would suggest the following:

1. This is a case report NOT an original full length research article type.
2. I agree with the reviewer that this is a very interesting manuscript and also its topic. However, there are many flaws that authors should seriously look into carefully.
3. Please get a native English speaker to edit this manuscript throughout.
4. Authors should add/replace more current published articles within the last 5 years.
