

### **Editor's Comment:**

Authors of the revised manuscript have addressed most of the reviewers' comments and suggestions. This paper is readied for publication acceptance after performing the following corrections:

1. As mentioned by some reviewers, "frequency and percentage" should not be considered as study methods. They are only two different forms to present the study results. Therefore, this kind of statements must be avoided in the text.
2. All the keywords duplicate the same as in the paper title. Other alternative selections must be re-chosen.
3. Please use "and" instead of "&" throughout the entire text, including the reference list.
4. Check to make sure if both "author's names" and "reference number, [8]" are necessary. In my opinion, the reference number, [8] is more than adequate.
5. Please use "et al." for citations with more than two authors.
