

Editor's Comment:

Accept with a revision of the manuscript as suggested in tracked comments:

It is a theoretical, opinion-based article, on a topical issue of broad interest, which is intended to engender discussion.

Discussion and conclusions are based on actual facts.

English quality: good.

The authors are advised to write the bibliography according to the requirements of the journal.

Part of this sentence was found in another article, which is not mentioned in the bibliography : " Arterial hypertension: If you already have chronic high blood pressure, you are at a higher risk of developing preeclampsia, First pregnancy. " etc. <https://www.cdc.gov/bloodpressure/pregnancy.htm>

1. Check the reference
 2. Include DOI number in all the references.
 3. Include more references.
 4. Discussion is too small. Results and discussion must be precise and clear
1. References must be cited in text as per the journal's template and listed with their DOIs as per the style of the journal.
 2. Kindly check the journal template.

Revise the whole manuscript as per the Journal's Guidelines.

- Most of the information has no clear source
- The investigation is not indicated both in the abstract and investigation part
- No clear information about the way of reviewing the procedure
- The investigation part must be reviewed again

- The paper seems written for a specific individual
- some of the phrases are not easy to understand
- The document has some grammatical errors.
