

Editor's Comment:

1. Authors have revised their paper based on some comments of referee.
2. Authors need to add sequence number to the references and use it in manuscript.
3. The contents of the references are incomplete or not consistent, for example: [9], [15], [17], [19], [20], [22], [26], [40], [45], etc..

Overall I recommend publication after minor revision.
