

Editor's Comment:

Please ask the authors to modify the language, punctuation marks and add a pie/graph for the tables to make better representation as the reviewers requested.

--The study is so small and should not get big conclusions. These types of studies are more of a suggestive or hypothesis generating than conclusion.

Rephrase this sentence---

The effect of anti-HUA drugs on the progression of CAD should be investigated further in large randomized trials. delete this sentence---- which may potentially provide new therapeutic approaches for the prevention and treatment of CAD.

-provide details of CAD severity Is there any association between severity and HUA along with other parameters?

Once they make the changes we can proceed with the publication. I am happy to see the manuscript after the changes. Thank you
