

Editor's Comment:

Please, this manuscript is very interesting and clearly written in correct English, well organized and free from ambiguities.

However, I noted some irregularities:

- 1- The Figures (1), (2), (3) et (4) are not well represented.
- 2 - On Figure (2) the curves and the equations are mixed and confused.
- 4- On Figure (3) the curves are not well representative
- 5- The Figures (1) and (4) are difficult to interpret.
- 6 - Take back Table 2 in two Tables.
- 7- Take back Table 3 all Data are not on view.
- 8- The manuscript is less referenced (nine references are very little).
- 9- The authors can take back all these with Matlab software.

Please, I suggest to the authors to take into account all these remarks in order to improve their work.

I think that if all these remarks are integrated by the authors, **the manuscript revised can be published in this Journal.**
