

Editor's Comment:

However, there is this statement at the end of the abstract and conclusion: "Finally, it could prepare some bakery products using raw materials free of gluten such rice flour, lentil flour and quinoa flour with high quality that are proper for celiac disease patients." Let the sentence be rewritten to make it clear (what does "...it could prepare..." mean?) and change it so that it is not the same in the two areas.

Otherwise I recommend the publication of the manuscript.
