EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>I have gone through all reviewer comments and the final manuscript.</p> <ol style="list-style-type: none"><li>1. Author has corrected most of the comments indicated by reviewers. There is a big lacking model understanding and analysis.</li><li>2. I am suggesting making a framework (independent and dependent) because the author performed regression analysis with 4 independents and 1 dependent.</li><li>3. Before performing regression the author must run an exploratory factor analysis (EFA) and then can run a regression.</li></ol> <p>Please send this correction to the author for another time correction</p>	<p>I have made some clarifications and corrections as shown</p> <p>I have made addition and corrections in the framework as shown highlighted in yellow</p> <p>Since, I have postulated hypotheses, about factors and patterns of the variables to be measured; the author has opted not to run exploratory factor analysis. (<a href="https://en.wikipedia.org/wiki/Exploratory_factor_analysis">https://en.wikipedia.org/wiki/Exploratory_factor_analysis</a>). However, I agree as a better option.</p>
