EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<ol style="list-style-type: none"> 1. Needs major grammatical corrections and scientific language overhaul. 2. Manuscript needs to flow in a scientific format recommended by AJORR (as the details of the article is skewed and needs flow for the clarification of methods and details of the outcome) 3. Green highlights show the grammatical errors 4. Red Highlights show the errors that need scientific corrections 5. The details of the patient reported outcome has not been quantified although these are patients with metastasis and need to know how these affected the local outcome as in duration of pain relief specific to the primary histologic diagnosis. 6. Quantification of the balloon distension correction of the kyphotic deformity and the intraoperative pre and post op would help better understand the importance of the vertebroplasty. 7. The article needs detailed specimen CT/Radiograph of the corrected kyphosis and or the lytic lesion and discussion of the radio densities in the provided X-rays as to whether extrusion of the PMMA or other findings. 	<p>A grammatical revision has been made</p> <p>A revision has been made to follow the plan recommended by the AJORR</p> <p>A scientific revision has been made as recommended</p> <p>We reported a comparison between the pre and post operative angular kyphosis to show the correction of the kyphotic deformity by this technique.</p>
