EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Yet, some additional remarks of detail would still improve the manuscript:</p> <ul style="list-style-type: none"><li>* in the Abstract, the phrase "Out of 713, 19 studies with total individual 1132538 were subjected to meta-analysis" should be more clear: please be more explicit by saying that the "19 studies addressed a total number of 1132538 individuals from the whole livestock"</li><li>* in the Abstract also, please make due correction in : "13.4% (95% CI 10.8–<b>16.0.6</b>)"</li><li>* in section 4.2. it might be useful to provide the signification of "C.I.", by explicitly designing its significance as "Confidence Interval" (although I agree that many readers would not need this precision)</li></ul>	<p>All required corrections have been done according to editorial comments. Please note that, the corrections highlighted with blue colour.</p>
