Manuscript Number:	Ms_JOCAMR_72559
Title of the Manuscript:	HISTOLOGICAL AND BIOCHEMICAL PARAMETERS EFFECT OF LIVER AFTER SUCROSE-INDUCED METABOLIC SYNDROME IN WISTAR RATS
Type of the Article	Research

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	It an excellent research work but the writing of the English has to be improved to bring the write up of the article to the standard of good English writing and I have made changes which I have highlighted in yellow and if this is shared with the authors and they deliberate on the changes as well as they agree that those changes are necessary and they effect the changes then the article could be published provided they do the following also: [1] They include the Key Words. [2] They revise the references to be consistent as I stated.	
<b><u>Minor</u></b> REVISION comments	See the revised article which should be shared with the authors anonymously.	
<b><u>Optional/General</u></b> comments	The authors must be congratulated and encouraged by their work and if they are encouraged to finalise their revision of the article, and the article is published, their article would form a pivot for other clinicians to follow-up with their type of research to ascertain if their results would be reproduced and in fact the study could be repeated in the same centre and other centres in the country and ECOWAS region as well as other parts of the world. Well done.	

**Review Form 1.6**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i> None apart from the need to improve upon the English as recommended
