PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The research is distinguished by its focus on a local fruit to reveal its benefits, and this is a strong point of the research	
Minor REVISION comments	<p>1- I think that the title should be modified instead of developing, writing products made from it Especially that the nutritional value of the products, as the study proved, is less in nutritional content than the fruit.</p> <p>2- What is the reference when making fruit powder and soup, or is it the traditional method used in the region? It has to be explained.</p> <p>3- Why use red rice and corn for sensory evaluation with fruit soup? It is necessary to detail at this point from the researcher and why he did not evaluate the manufactured products with a control sample represented by the fruit.</p> <p>4- It is preferable to add more references to the study.</p>	
Optional/General comments
