<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	Dear authors, the manuscript "Investigation of the Effect of Frying Temperature and Time on Thermophysical Properties and Quality Attributes of Deep-Fat Fried Plantain (Dodo)" is interesting and worth investigation. I do recommend much more details on vegetable oil, for instance composition, correlation with thermal processing, etc. Have you considered to analyse acrylamide? It is well-written, however, please double-check enghidh and formatting, for instance "the plantains were deep-fried"; "banana ( <i>Musa spp.</i> )"	
<b>Optional/General</b> comments
