PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The study design is faulty and confusing. From the title, it is cleared that the author intends to formulate complementary foods from the flour blends of cereal, soybean and carrot pomace. However, the author only presented results on the raw sample singly instead of the blended samples. Besides, analysis on complementary foods should be more than phytochemicals and pasting properties.	
Minor REVISION comments		
Optional/General comments
