PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Good study. Correlation with age, sex of rats; clinical symptoms etc would be good	
Minor REVISION comments		
Optional/General comments	A baseline Hb could have been measured before giving paraquat. A retic count could have been done too in different time frame, to see the marrow response after vit C, E treatment. ABG, LFT, RFT could have been added since these were organs mainly affected Histopathology of all organs would be excellent to give the exact changes in organ level.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
