PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>This study is interesting and original but I believe that some concepts and statements expressed in the discussion and in the conclusions can lead to dangerous messages. The use of adequate masks (example FFP2 and FFP3) hygiene of hands and clothing together with correct information (e.g. do not touch the face if the hands are not sanitized or avoid shaking hands) are essential in the transmiSARS-CoV2 virus of the current severe pandemic. In my opinion the authors should reconsider some concepts in their work to avoid being given equivocal and dangerous informationIn light of this revision, however, I still considinteresting and original</p>	
<u>Minor</u> REVISION comments	<p>Tables 3a and 3b can be deleted since such data are already shown in the respective figures</p>	
<u>Optional/General</u> comments
