PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Interpretation of results: the authors should fully utilize and discuss the data from each table. I suggest showing the results data from table 7 using a graph and comparing the results for each site.	
Minor REVISION comments	I suggest providing more the latest references that related with the study.	
Optional/General comments	Overall, the work is nicely written and organized. This is an interesting study and the authors have collected the data for different sites to identify the dynamic properties using MASW method. However, in my opinion the authors should discuss the data analysis and I believe this unique data has potential to be utilized.
