

Review Form 1.6

Journal Name:	Asian Journal of Biotechnology and Genetic Engineering
Manuscript Number:	Ms_AJBGE_86715
Title of the Manuscript:	AEROBIC BIOREMEDIATION OF BREWERY EFFLUENT USING Escherichia coli and Pseudomonas sp.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajbge.com/index.php/AJBGE/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	E.coli and Pseudomonas are both identical in terms of being gram negative, I believe a combination of Gram +ve and and Gram -ve can also be tried. The two are quite identical for terms of enzymes that they produce, so may be synchronous in activity too, May be a combination with streptococcus or staphylococcus can also be tried.	
Minor REVISION comments	Well done study, but lowering a few parameters may not be enough in field situations, my recommendation, study various parameters infact, all of them and bring them down so water can be used for Various purposes and recycling is completed.	
Optional/General comments	A good study	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
