Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ul style="list-style-type: none"> • Part of the plant (Leaves) used in the study can be mentioned only once in the title • Better not to repeat keywords from the title • Throughout the manuscript, dose administered to animals must be expressed as concentration in mg/kg body weight • Precise aim and objectives of the study missing in the introduction section • Update references from last five years • Use standard SI units for all values and give a space between the numerals and units • Italicize the botanical name wherever applicable in the introduction • Extraction has been carried out using 220 and 250 kg of raw materials? Kindly check, looks huge • Ethical clearance / approval for using animals is mandatory • The lethal dose of Cadmium in exact concentration and the methodology employed for estimating the LD50 not specified in the manuscript • Route of administration of cadmium missing • There must have been a positive control group of animals used in the study administered only with heavy metal. Only then comparisons can be authentic • Please specify the standards used in determination of albumin and bilirubin • Formulae should be created using Equation tool in MS-Word • Replace "reagents" with the actual chemical used • Volume of chemicals used need not be expressed in words • Kindly ensure chemicals without spelling mistakes • Discussion section should be renamed "Results and discussion" • P-value is missing in the table and discussion • Discussion could be a little elaborate 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
