### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Congratulations to the authors for bringing this very important topic. The title already engaging. However the lack of correlation in background section made this manuscript become dull. Please write concisely the significance of the issue, epidemiology basis, and goal of this review. The manuscript needs a picture consist of pathophysiology chart of biochemical and genetic approaches for neurological trauma and tumor. The authors should make the discussion part, before the conclusion. This is considered very important.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	None.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
