Manuscript Number:	Ms_AJCRMH_78529
Title of the Manuscript:	Acute Fatty Liver of Pregnancy: Case report
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrmh.com/index.php/AJCRMH/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This is a very rare case and is worth reporting. The author described the case very clearly, although some minor details were omitted. For example: 1) AFLP often occurs in the first pregnancy, and the incidence in the second pregnancy is extremely low, therefore, please analyze the reason why the patient did not develop the disease in her first pregnancy but second pregnancy. 2) The sex of the fetus is helpful in diagnosis, as the ratio of male to female is about 3:1. 3) The specific treatment of patients in ICU and fetal care can be described more, so that peers can learn better. 4) Explain the reason of normal liver color ultrasound examination.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
