Manuscript Number:	Ms_AJCRMH_81916
Title of the Manuscript:	Ankylosed pubic symphysis: A case report of an idiopathic clinico-radiological mismatch in an emergency trauma
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrmh.com/index.php/AJCRMH/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is well compiled but lacks some important points : The author is discussing about all causes and D/D of the ankylosed symphysis pubis it would be mandatory to do blood work up for spondyloarthropathy , CRP , imaging of spine preferably MRI to rule out any occult pathology without these work up merely on basis of single AP x rays discussion is not complete . I therefore suggest for revision of the manuscript with inclusion of these basic tests before labelling it idiopathic condition.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
