PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | <p>The title should be (The aetiology and diagnosis of primary myelofibrosis: Case study). The last line in the abstract need paraphrasing (The study describes a case that diagnosed to have myelofibrosis when he presented with splenomegaly as a main symptom). The introduction should be at least one page. References in the introduction should have number 1 & 2. (Not 11,12) The aim of study not clear and needs to paraphrase (either to describe or explain or explore something new or hypothesis) The method should be mentioned (the data depends on observation or interview or recorded document). Reference numbers are not clear through the paragraphs. The table should be after introduction but not after references. Instead of (our patient) you can use (this case study)</p> | |
| Minor REVISION comments | It is better to write a conclusion of your observations about the case. | |
| Optional/General comments | A list of abbreviations of variable used in the study can be added to be clear for the readres. | |
