PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This case report describes a COVID-related recurrent focal myositis in a 4-year-old boy. Benign acute childhood myositis is a mild and self-limited process. However, there are no clear guidelines for investigation and follow up in children with suspected viral myositis. Workup included in this case renal function and urine analysis to rule out rhabdomyolysis and myoglobinuria.</p> <p>Because of the nature of this rare topic, most references are older than 10 years. I suggest you mention the newest reviews about COVID-related myositis in adults (for example: Saud A, Naveen R, Aggarwal R, Gupta L. COVID-19 and Myositis: What We Know So Far. Curr Rheumatol Rep. 2021 Jul 3;23(8):63. doi: 10.1007/s11926-021-01023-9. PMID: 34216297; PMCID: PMC8254439.) and discuss in 1-2 sentences the possibility of a virus-triggered onset of autoimmune inflammatory myopathy, a differential diagnosis in patients with recurrent flares.</p>	
Minor REVISION comments	Please provide the year of publication for the references 2. and 5.	
Optional/General comments	I suggest accepting this case report with minor revisions.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
