PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>I am pleased to review this interesting case report on peripartum Cardiomyopathy relapse. I have few concerns related to the case.</p> <ol style="list-style-type: none">1. Patient had an uneventful course with subsequent pregnancy, excludes residual LV dysfunction.2. New onset LV dysfunction in a middle-aged female should be evaluated for viral myocarditis, coronary artery disease and stress- induced cardiomyopathy. In this cases the other differentials are not excluded (no MRI, no coronary angiogram). Reversible nature of LV dysfunction may explain the possibility of viral myocarditis or stress-induced cardiomyopathy.	
Minor REVISION comments		
Optional/General comments
