

Review Form 1.6

Journal Name:	Asian Journal of Case Reports in Surgery
Manuscript Number:	Ms_AJCRS_82048
Title of the Manuscript:	Rupture of Left Lobe Amoebic Liver Abscess into the Left Lung-A Case Report
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrs.com/index.php/AJCRS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Meaning of abbreviations (e.g. CECT) should be explained at the first use.2. Fig. 2a, 2b, and 3 are poorly legible. I would suggest to choose 1 or 2 the best scans in each Figure and replace these Figures with them.	
Minor REVISION comments	<ol style="list-style-type: none">1. I would prefer term "radiograph" or "X-ray" over the term "skiagram" (see legend to the Fig. 1).2. The sentence on the liver abscess (in the last paragraph of the Discussion) should be replaced to the first paragraph of the Discussion (prior to the description of lung changes)	
Optional/General comments	It is an interesting article. Due to its educational value, I find it suitable for publication; however, a minor revision is necessary (see above)	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
