Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The article deals with an interesting topic due to its rarity. Breast tuberculosis, in fact, is a uncommon tuberculosis form and there is little literature about it. The manuscript can be improved if the authors make the Discussion more consistent. There are at least two recent articles that are not cited that could contribute in this regard. The articles are:</p> <ul style="list-style-type: none"> • . Baykan, A.H., Sayiner, H.S., Inan, I. <i>et al.</i> Primary breast tuberculosis: imaging findings of a rare disease. <i>Insights Imaging</i> 12, 19 (2021). https://doi.org/10.1186/s13244-021-00961-3 • Abha Shrestha, Keyoor Gautam, Devish Pyakurel, Santosh Pradhan, Vivek Pant, Breast tuberculosis, a rare entity, <i>IDCases</i>, 2019;15: e00530,. https://doi.org/10.1016/j.idcr.2019.e00530..... <p>In my opinion, this is the central point that should be considered by the authors to increase interest in their case report.</p> <p>Other aspects that need to be reviewed: In presentation of case: a) Please, give details of the diagnosis of the patient's pulmonary TB; AFB positive ?, culture? abnormal Chest X-rays? b) In the sentence "Anti-tuberculous treatment was continued and the patient gradually recovered well " --- Plaese clarify this ATT ---- drugs/ regimen? total time ?</p> <p>The conclusion should refer only to the findings of the case report and not make any other considerations. Reference 9 ---- <i>Baharoon S</i> is not well cited --- the authors used Autor (year) and not Vancouvert pasttern. ;</p>	
Minor REVISION comments	<p>In the Abstract: cite in Aim: Antitubercular therapy in full, which appears for the first time. Write tuberculosis in full for the first time and then TB throughout the text</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
