PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Knowing the risk factors, presentation, complications and imaging characteristics of retained surgical sponges is vital for early detection of this serious problem. This case report of surgical sponge remaining in the abdomen, risk factors, presentation, complications and imaging characteristics of these forgotten surgical sponges is vital for the early detection of this serious problem. In this respect, it is a very important study. In addition, this study was well designed. The sources and images used are sufficient. In my opinion, it is a case report suitable for publication in your journal	.
Minor REVISION comments	Check all references	
Optional/General comments	Add the following references Auger M, Olin S, Morandi F. Novel CT Features of an Abdominal Gossypiboma in a Female Dog. Case Reports in Veterinary Medicine. 2019 Jun 24;2019. Alemu BN, Tiruneh AG. Gossypiboma: a case series and literature review. Ethiopian journal of health sciences. 2020 Jan 1;30(1).	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
