### PART 1: Review Comments

|                                     | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| <b>Compulsory</b> REVISION comments | <p>We fully appreciate the effort made by colleagues to accomplish this report. The topic itself is of great importance. Having professed my general enthusiasm for the topic and its importance, I have some concerns that I feel are tractable but require substantive effort. Our ambition is for the research formula to be in keeping with the pure scientific method, so we wanted to include a set of notes that we see as necessary to prepare the manuscript in a more sedate way that achieves the purpose of academic publishing.</p> <p><u>My comments here are concerned solely with the re organization of the manuscript. Consideration of these points will, I believe, lead to an improved report that better illustrates the key concepts and conclusions.</u></p> <p><u>If the authors are able to clarify the few limitations, add a helpful conceptual model, and revise the report to clarify the interpretation and application of this manuscript for the journal audience, this should make a nice addition to the literature.</u></p> <p><u>I recommend the manuscript for publication after some adjustments have been taken into account. Please pay attention, review the attached comments (yellow colored icons in the main text), and rewrite the article accordingly as possible.</u></p> |   |
| <b>Minor</b> REVISION comments      |  |   |
| <b>Optional/General</b> comments    |  |   |
