Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Jejunal diverticula are uncommon, acquired lesions which are usually asymptomatic. When symptomatic they present with chronic nonspecific symptoms like pain, nausea, malnutrition and sometimes with acute presentation like gastrointestinal hemorrhage, peritonitis and obstruction. While chronic pain and malabsorption occurs in 40% of cases, perforation occurs only in 2.3–6.4% of all diverticula-bearing patients.</p> <p>REFERENCES SHOULD BE UPDATED.</p> <p>Perforated Jejunal Diverticulum: A Rare Complication</p> <p>Sumitroj Singh, Harindra P. S. Sandhu, and Varun Aggarwal. Saudi J Gastroenterol. 2011 Sep-Oct; 17(5): 367.</p> <p>Perforated jejunal diverticula- a rare cause of acute abdominal pain: a case report</p> <p>Mohammad Esmail Akbari, Khashayar Atqiaee, [...], and Mohammad Reza Sobhiyeh. Gastroenterol Hepatol Bed Bench. 2013 Summer; 6(3): 156–158..</p> <p>Gurala D ET.AL Perforated jejunal diverticulitis. Case Reports in Gastroenterology. 2019, Vol.13, No. 3.</p> <p>Leigh, N., Sullivan, B.J., Anteby, R. <i>et al.</i> Perforated jejunal diverticulitis: a rare but important differential in the acute abdomen. <i>surg case rep</i> 6, 162 (2020).</p>
