## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. There are numerous "Grammatical" mistakes, so, corrections and language editing are obligatory (Major).</p>	
<b>Minor</b> REVISION comments	<p>1. Capitalization of all letters in the "Title" and in "Subheadings titles" is unsuitable, please, change. (Minor).</p> <p>2. the following sentence in "Abstract"; "Herein we report a case of transradial angiography with ...extra stiff wire." is too long and bad-written. Please, reconstruct it into more than one sentence or summarize it. (Minor).</p> <p>3. Using of superscript numbered references in association with ref such as (extremity<sup>ref3</sup>) is unknown in writing of references style. Please, change to (extremity<sup>3</sup>) or in parentheses or square brackets and apply this for all. (Minor).</p> <p>4. Also, using of superscript of figure citing inside the text such as (artery<sup>fig1</sup>) also unknown in citing the figures. Please, change to (Figure 3) in parentheses or square brackets and apply this for all. (Minor).</p> <p>5. The author is accustomed to using inappropriate very long sentences such as the following sentence in "Introduction"; "Radial artery access is associated with .. coronary intervention (PCI)<sup>ref1</sup>." Please, apply the above point in the "Abstract" and apply this for all. (Minor).</p> <p>6. Please, change the following sentence in the "Case report"; "Her preoperative echocardiography workup revealed severe left ventricular dysfunction[LVEF30%], global hypokinesia and severe PAH[PASP70MM] ." to "Preoperative echocardiography showed severe left ventricular dysfunction[LVEF30%], global hypokinesia, and severe PAH [PASP 70mm]". (Minor).</p> <p>7. The number of figures regarding the "Case study article" is too much. Maximum 2-3 that is enough. But if they are necessary to the article, the author can be collected in two figures and subdivided as; figure 1A, 1B, 1C, etc. (Minor).</p> <p>8. Unfortunately, the author mentioned the study "Results" in the text of "Conclusion". Please, the article "Conclusion" is the benefits of the study "Results". So, reconstruct your "Conclusion" depending on this base. (Minor).</p>	
<b>Optional/General</b> comments	-	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
