PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	I have read with interest the review regarding arrhythmia induced by myocardial infarction. This is a challenging problem and there are a lot of controversial data regarding the management of these patients. This is generally a well-written and comprehensive article that may be accepted for publication after some minor revisions. Considering the current pandemic period and also the frequent association of this pathology with supraventricular or ventricular arrhythmias, I recommend the authors to include some particularities related to the management of arrhythmias in patients with myocardial infarction and COVID-19 infection, in order to highlight the original elements of the study.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
