The review must include major studies like INTERHEART study which must be reviewed and be dealt in details 2. The tobacco consumption can be "second Hand" or "indirect" and there is enough literature even on "third hand" smoking to be discussed and covered in the article 3. In many Asian countries, tobacco is consumed in various other forms as well and the risk associated with them also needs to be covered 4. Smokeless tobacco is the new kid on the block! The same is banned in various Asian countries but the CV risk with them is also not covered 5. Many important CV disorders apart from atherosclerotic diseases also have been evaluated for the associations.
