### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The article is well structured, it describes very well how treatment may be challenging for the clinician and the importance of patient education and awareness of the disease. Some point should be addressed:  -I would replace the Results/Discussion section with the heading " discussion"  -In the conclusion section replace the term " rhythmic " with " arrhythmic".	
<b>Minor</b> REVISION comments	-if possible the Figure 1 and Figure 3 quality should be improved.  -Figure 2 could be integrated with video as a web addenda. This will increase the value of the paper.	
<b>Optional/General</b> comments
