Compulsory REVISION comments	After going through this paper it seems that there are a number of issues which should be addressed to make it publishable. First of all, descriptive study does not mean devoid of use of statistical tools. This study has got proper setting for use of large scale statistical tools by compiling more information from the selected entrepreneurs. Again, in page no 5, the first paragraph started with "According to (19)" and then again on this paragraph "(20) opined that". Such things should be replaced with name of the authors followed by reference in (19) and (20). The sentence structure also needs little bit overhauling.	
Minor REVISION comments		
Optional/General comments
