

Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_85508
Title of the Manuscript:	Conflict of Land Use Types over Geomorphological Space of Anambra State, Southeastern Nigeria: The Analyses and Predictions
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> The document is in US English, but some in-text English are in UK English, i.e. neighbourhoods, centres, favourable, etc. The information referenced from Castlelyon Corporation, n.d is very important, as such, I strongly suggest the author to find the published year or a reliable source. Fig 2 should be made a picture mode, and be inserted into the article "in line with text". Also, Fig 2 is not referred to in the text, except reference to "...presented below", which should be avoided." The author to make full stops after the name of the Figure or Tables. E.g. Source: Authors' Fieldwork, (2021). Section 2.2, sentence number 3, which statesSecondary data that were used include images and raster files collected from United States Geological Surveys (USGS) Earth Explorer... is misleading. Also, images and raster files means the same in your sentence. Rephrase! <ul style="list-style-type: none"> Section 2.3 Data Collection, and I quote: "Data for this study was collected through primary and secondary sources. They involved the use of Global Positioning System (GPS Extrex 10) for identifying point location of areas of significance, direct field observations, interviews to obtain peoples view and perception of land use pattern in the study area, focus group discussions to get the general knowledge of the residence of the study area with regards to the land and land use pattern. The use of satellite..." this does not clarify which methods were primary and which were secondary. Please rephrase accordingly. Section 2.4, second last sentence ... ArcGIS 10.2 soft ware was also... did you mean "software"? Under chapter 3: titled: 3. RESULTS ANALYSIS AND DISCUSSIONS, verify the word "... buoyance, just before Fig 6. You made reference to Table 4 as ... The table above shows the rotated. Such language could mean every table above. Also verify that the table means Table with information! As text below Table 6. Figure 10, 11, 12 and 13 are just inserted in this manuscript without description of those Figure. Please describe your Figures and Table, also making reference to Figures and Table numbers. Attend to details in your references, such as Adefioye, S.A., (2013). Analysis of Land Use/Land Cover Pattern along the River Benue Channel in Adamawa State, Nigeria. Academic Journal of Interdisciplinary Studies, 2, 5: 95-107. DOI:10.5901/ajis.2012.v2n5p95. Anambra State Government (2020) Government Olaleye, J.B., Oludayo, A.E, and Igbokwe, Q.N. (2009); land use change Solaimani, K., Modallaldoust, S., Lotfi, S. (2009); Investigation of Land Use on Soil erosion process using geographical information system International System International Journal of Environmental Science & Technology. 	
Minor REVISION comments	<ul style="list-style-type: none"> The land use cover change (LUCC) is repeated a lot as it appears. The author to use the abbreviation after first instance. In the same vein, terms like Geographic information system appears alone, whereas abbreviation such as GIS is being used without been fully interpreted as to what it stands. <ul style="list-style-type: none"> Insert space after the text leading to 2.2 Research Design.
