Minor REVISION comments		
Optional/General comments	<p>The antimicrobial era has been marked by successive discoveries of a wide range of antibiotics and the subsequent emergence of antibiotic resistance. In recent times, development of antimicrobial resistance is rapidly changing, and the impending public health challenges these may cause in many health sectors need worldwide coordinated interventions. Recently, there has been a plethora of research information on carbapenem resistance, however, there are few comprehensive review papers discussing the research information. The present paper seeks to provide an in-depth review providing up-to-date information on the antimicrobial resistance. The paper can be useful, the subject being very broad.</p>
