Manuscript Number:	Ms_AJMAH_82185
Title of the Manuscript:	Secondary Analysis of Maternal Characteristics and Pregnancy Outcomes of COVID-19 Positive Pregnant Women in Sri Lanka using National COVID-19 Positive Pregnant Women Surveillance
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. Better clearly write which study design used consistently both on abstract and methodology part. The author stated somewhere descriptive and somewhere retrospective cohort</p> <p>2. Revise your OR (Univariate) and adjusted Odds ratio. For example, the univariate for comorbidities excluding anaemia. One or more morbidity= <math>2014/47 = 42.85</math>  No morbidity= <math>407/25 = 16.28</math> therefore the OR Will be <math>42.85/16.28 = 2.63</math>. but not 0.38 Thus in this regard all needs to be revised again.</p> <p>3. Then discussion will also be revised based on the finding</p> <p>4. The conclusion and recommendation also needs revision</p>	
<b>Minor</b> REVISION comments	<p>1. Title for table and figure should include in description, what, when, who and where components. The where and when components are missing thus include it</p>	
<b>Optional/General</b> comments
