PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The theme treated by the authors was well structured. At first it was highlighted that COVID-19 had a deleterious effect on world demographics causing over 3.8 million deaths worldwide, emerging as the most devastating global health crisis since the 1918 flu pandemic era. on the main concerns regarding the disease: lack of specific antiviral therapies. Also interesting are the results of the studies that have provided some promising results for the management of COVID-19: in particular Molnupiravir, monoclonal antibodies, janus kinase inhibitors and remdesivir. I consider the work valid and supportive for future studies.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
