

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Medicine and Health</a>
Manuscript Number:	Ms_AJMAH_86622
Title of the Manuscript:	Could steroids cause dysrhythmia in covid-19 patients? A case report
Type of the Article	Case study

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy>)

### ART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>"bradycardia developed following the administration of methylprednisolone and improved upon discontinuation"- case 1-2 how long? Duration?            "Bradycardia as a favipiravir side effect is uncommon"            "Electrocardiographic examination revealed sinus bradycardia" - first case not describe what kind            Figure- derivation is not the same</p>	<p>Very well written and objective article, I suggest inserting and standardizing 3 important data in all cases (case 3 is the most complete)</p> <p>1) <b>event chronology</b>: describe day, time of onset and duration of bradycardia after drug infusion was beginning</p> <p>2) <b>drugs in use</b>: mention all the drugs that the patient was receiving, in the first case favipiravir is mentioned, but I believe that the others cases received too (other drugs than those of chronic use) but as a result of COVID-19</p> <p>3) <b>ECG report</b>: mention all of them in a uniform way, for example case 1 does not say if it is sinus...</p> <p>4) <b>FIGURE</b>: place the same derivation (EX: D II long), if possible, condense the changes in the 3 cases into 1 figure</p>	
<p><b>Minor</b> REVISION comments</p> <p><b>60 BPM, 68 beats/min,</b>            ICU patients            CT scan, IV BID, IV TDS, LV systolic, (EF: 55%), ESR was 60 mm/h,            covid-19 pandemic</p>	<p>Describe the meanings of abbreviations</p>	
<p><b>Optional/General</b> comments</p>
